

**REMOTE MANAGEMENT AND ACCESS OF DATABASES, SERVICES AND
DEVICES ASSOCIATED WITH A MOBILE TERMINAL**

ABSTRACT OF THE DISCLOSURE

Apparatus, method and computer products are provided for remote network access and management of mobile terminals. The mobile terminal executes a web server application that allows remote network devices to access the mobile terminal. In
5 addition, the mobile device executes a content engine that provides the ability to access databases, services and devices associated with the mobile terminal. The invention provides greater flexibility in accessing and managing the data stored on the mobile terminal and provides for remote control of the services and devices associated with the mobile terminal.
